2-Circuit Monorail Adjustable Standoff

By Visual Comfort Modern

Description

Two-circuit Monorail adjustable standoffs cable virtually disappears for a clean and elegant look. It is best used on fairly straight runs with a drop greater than 6 inches. A wire grip allows you to easily shorten or lengthen the cable to size it for use. Use standoff supports every three feet of Two-circuit Monorail run and at corners. Standoffs can be positioned to cover points where rails are joined. For best appearance place the last standoff 4-6 inches from the end of the rail and place standoffs symmetrically. ETL listed. Available with 12 or 30 feet of field cuttable suspensions cable. 0.7W x 4H.
