

BRAND Visual Comfort Modern

DESCRIPTION

The Monorail Adjustable Standoff is designed for use with the Tech Lighting Monorail system. Its thin cable virtually disappears for a clean, elegant look. It is best for fairly straight runs with a drop greater than 6 inches. A wire grip allows you to easily shorten or lengthen the cable to size it for use. Use standoff supports at every 3 ft of Monorail run and at corners. Standoffs can be positioned to cover points where rails are joined. For the best look, place the last standoff 4-6 inches from the end of the rail and place standoffs symmetrically. Note: The Aged Brass finish is only available for the 144 inch height.
