

Revelite AL Picture Light

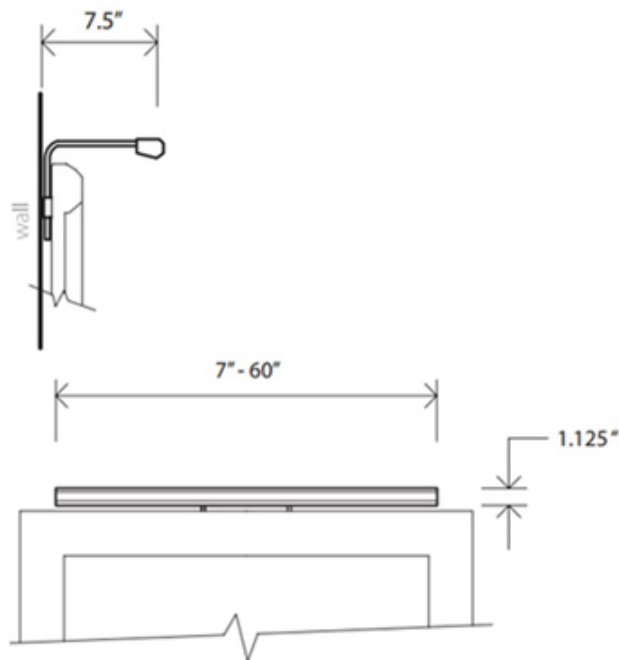

Description:

The all-new Revelite AL is a revolutionary picture light that is custom built and tuned at Cerno's facility in Laguna Beach, California. This fixture evenly illuminates the entire surface of a painting using an extremely high color rendering light source. The uniformity and quality of light that this fixture emits is not achievable with the standard off-the-shelf fixtures available today. The Revelite AL has a 5-10 watt 24 volt LED array bulb which emits no UV or heat. 78 lumens per watt and 390-780 lumens per foot depending on size of fixture. All of these unprecedented attributes are embodied in an unobtrusive fixture profile that almost disappears when one views the art. Dimmer is included. The Revelite AL is custom made and is available in white, gold, oil rubbed bronze, black or brushed aluminum. Available for art 7 to 60 inches wide and up to 36 inches tall. If art is larger than 60 inches, multiple fixtures can be used. Call one of our Certified Lighting Experts today to order.
