DESCRIPTION

Recessed Lincandescent features warm linear incandescent lighting presented on a 1/4-inch thick narrow faceplate that flushes up to dressing and bath mirrors. The housing containing the sockets and wiring is recessed into the wall to create a built-in fixtureless appearance. Finish available in etched silver, etched gold, etched black, polished silver, polished gold, polished black and white baked enamel. 60 or 150 watt, linear incandescent lamp with 1000 hour rated life (not included, sold separately). Optional custom length made to order (non-cancelable and non-returnable). Mirror lighting application note: because linear incandescent lamps produce a soft quality of illumination, it is often desirable to provide general lighting to supplement incandescent luminaires. Task light distribution. UL and IBEW, damp location. Available in 20 and 40 inch lengths. 2W x 2.75 inch depth.
