

Description:

LED power supplies transform and regulate power from a line voltage power source into low voltage power for use with LED lighting. The power supply accepts input voltage of 120 volts AC and outputs 12 volts DC power up to 60 watts. The low voltage output may be dimmed using an electronic low voltage dimmer (sold separately). The aluminum enclosure allows electrical connections to be made inside the box. Knockouts are provided for use with 1/2" conduit.
