

Description: TruLine .5A TruQuad offers glare-free architectural lighting accents—in square or rectangular configurations— that fit within 5/8" drywall. The 24VDC linear LED system features a shallow, 5/8" deep plaster-in aluminum extrusion (thinner than drywall) that houses a single row of high CRI, commercial-grade white or color changing LED Soft Strip. Its .5" wide diffuser lens projects a clean line of light without LED dots. System mounts directly to studs without joist modification. TruQuad is sold in 1 inch increments from 6 inches to 400 inches. Coordinate installation with electrician and drywall contractors. Fixture includes 5 year warranty. ETL listed. Patent pending.

Design Note: TruQuad can be installed on a single surface (wall or ceiling) and allows for the creation of personalized square or rectangular configurations. LEDs mount to side wall of the channel, wrapping continuously to create seamless illumination

Applications: Indoor Only — General illumination and architectural accent lighting for offices, hospitality, retail, residences, libraries, closets, hallways, bath/vanity.

TO ORDER TRUQUAD POWER SUPPLY

Select power supply based on total system wattage (100 watts max before refeeding). Order the desired Class 2, 24VDC power supply that best fits the dimming and mounting conditions.

See example below for ordering 384 inches of TruQuad, which consumes 160 total watts and requires (2) PSB-100W-ELV-24VDC power supplies. See Pg. 1 of specification sheet for compatible power supply options and TruQuad ordering code.
