

GENERAL PRODUCT INFORMATION:

This product is suitable for damp locations.  
This instruction shows a typical installation.

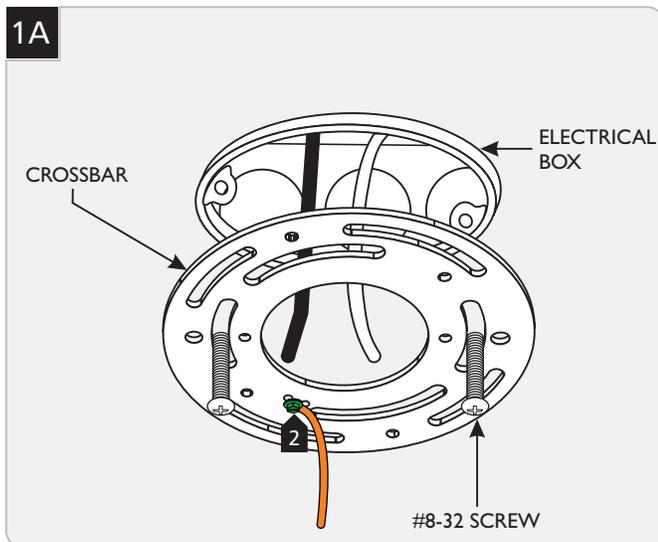

CAUTION—RISK OF FIRE

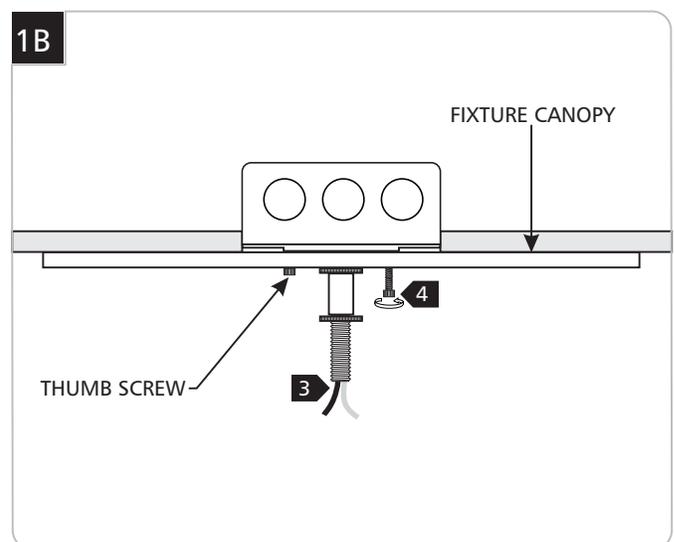

This product requires installation by a qualified electrician. Before installing be sure to read all instructions and DISCONNECT POWER TO THE ELECTRICAL BOX.

NOTE: Assistance will be need to install this fixture.

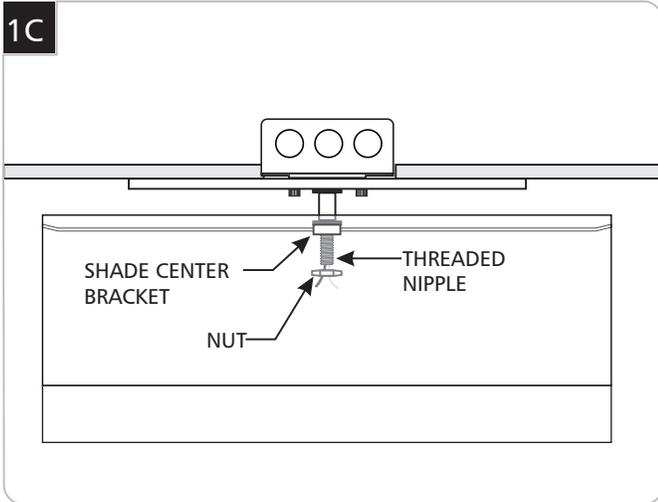

Installing the Fixture

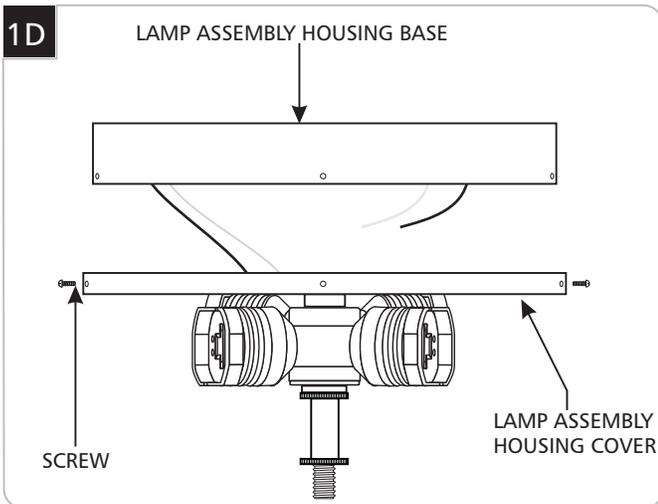

- 1 Mount the crossbar to the electrical box using the provided screws.
- 2 Make sure the fixture canopy is grounded in accordance with local electrical codes.

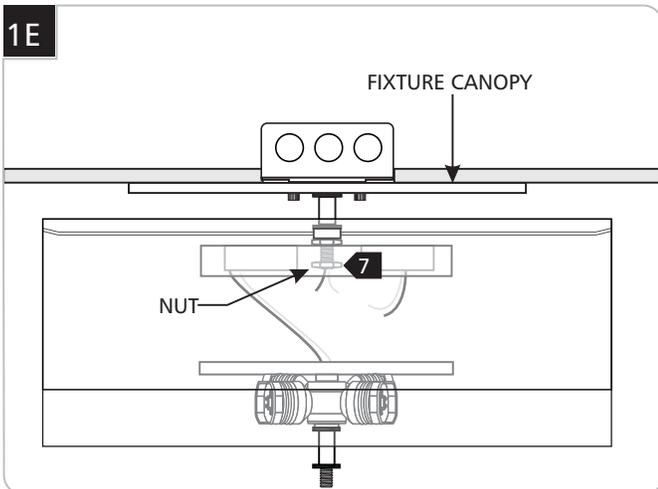

- 3 Feed the electrical wires through the canopy post
- 4 Mount the fixture canopy to the electrical box with the two thumb screws.

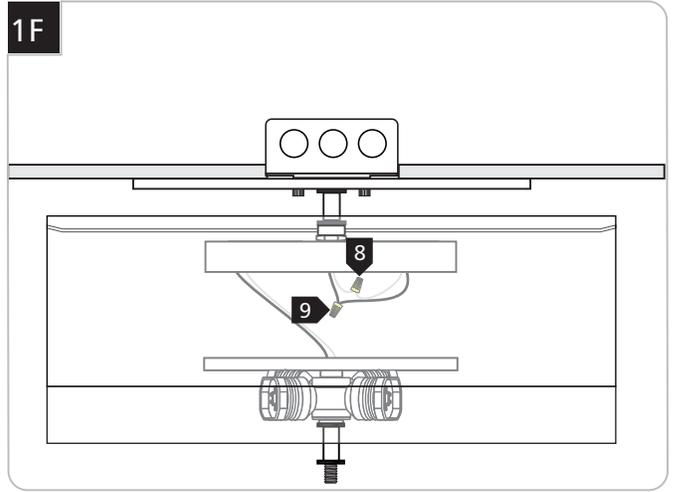

**5** Insert the shade onto the threaded nipple through the shade center bracket. While holding the shade in place, screw in a nut and secure the shade by completely tightening the nut.

**6** Detach the lamp assembly cover from the base by loosening and removing the four screws.

**7** Install the housing base to the threaded nipple and secure it by screwing on a nut and completely tightening it.

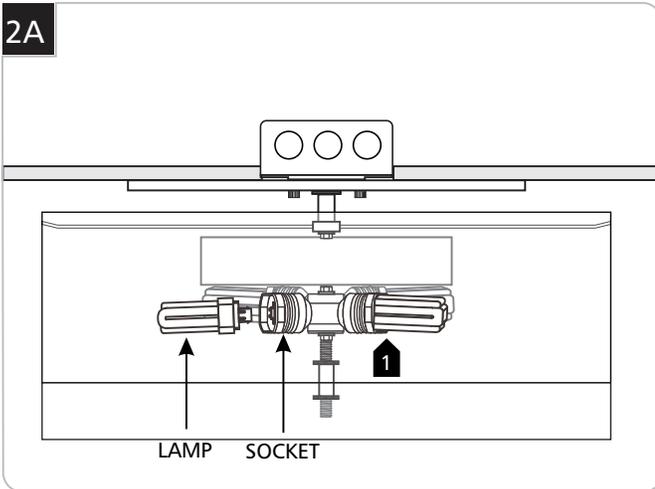

**8** Connect the fixture white wire to the neutral power line wire with a wire nut.

**9** Connect the fixture black wire to the hot power line wire with a wire nut.

**10** Place all wires and wire nut connections inside the lamp assembly housing and re-install it. (Reversal of step 1D)

## Installing the Lamps & Glass Disk

2A

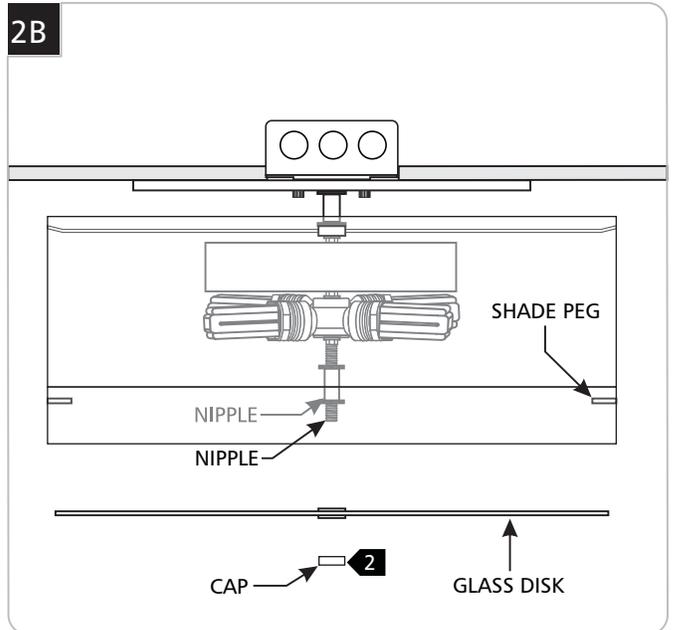

**CAUTION:** To reduce the risk of a burn or electric shock during relamping, disconnect the power to the fixture.

Use MAX 18 Watt GX24Q-2 Base Triple Tube Compact Fluorescent Lamp.

**1** Push the lamp base firmly into the sockets.

2B

**2** Place the glass disk onto the nipple and secure it against the shade pegs with the cap.

**NOTE:** Do not over tighten the cap. Overtightening may break the glass and result in injury. Ensure that the silicone grommet in the glass disk is in place.
