Iris

DESCRIPTION

A 5 inch aperture specification grade open downlight reflector for 100W maximum A-line tungsten-halogen lamps. The 50 degree cutoff to lamp and lamp image provides a smooth, glare free medium beam distribution of light. Use for general area illumination. Reflector available in black, clear, haze, gold, warm haze, gloss white and matte black. Features white die-cast flange. Flange also available in raw natural die-cast and self flange painted white. P5 platform (housing) and M120 lamp module is required to create a full fixture. 5.25 aperture. Overall diameter is 6.75 inches.
