

# Aurora RGB/Halogen Square 3.3 Inch Invisible Trim/Housing

**Designer:** Gregory Kay

**Description:**

Aurora RGB (Red-Blue-Green) Halogen Square 3.3 Inch Aperture Invisible Trim with IC and Air-Tight Housing is a specification grade, recessed adjustable accent fixture for plaster or drywall construction. The flush mounted rigid plaster plate, which is finished into the ceiling, maintains a flat finish. Uplighting the RGB LEDs within the Aurora dome creates color at the ceiling plane while an LED white light projects downward, resulting in an optical illusion. Combining the knife edge 3.3 inch aperture with the Aurora dome and tilt gear hidden behind the lamp creates a clean internal look. LEDs may be controlled to be static color, cross-faded, or set to the beat of music. Fixture offers hot aiming with 0 to 45 degree vertical adjustment and 362 degree horizontal rotation without beam clipping. Precision machined gear adjustment is concealed behind the lamp. Features self locking tilt and manual locking horizontal rotation. Includes one 12 volt 75 watt toroidal magnetic low voltage transformer for halogen MR16, dimmable with a magnetic low voltage dimmer. LED driver/power data supply (PDS) and RGB LED modules are integral and serviceable through the aperture. RGB LEDs may be programmed as desired using a DMX signal. Compatible with Pure Lighting CDP and CTP controllers, sold separately. Housing is IC and Air-Tight, suitable for remodel or new construction. Dome features a highly reflective white painted finish which blends the colors of RGB LEDs. Hides electrical hardware and tilts for easy access to junction box.
