

Fortebraccio Wall Mount

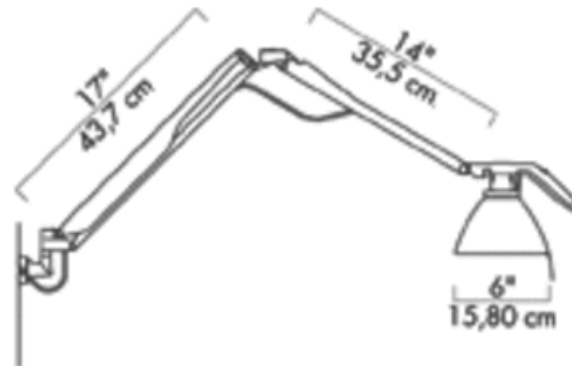

Description:

With its new joints and base, Fortebraccio guarantees an extraordinary fluidity of movement and total light positioning freedom. Thanks to its innovative central joint, the lamp's two arms rotate independently, horizontally and vertically, allowing it to take on extreme and functional positions. The lamp's distinctive handle - which includes a normal switch - is designed in such a way as to be easily held and maneuvered. Fortebraccio 05 comes with a universal mount, allowing it to be fitted directly on tables, walls and, thanks to its particular system of joints, on slanted surfaces. Finish in metal. One 100 watt, 120 volt, A19 medium base incandescent lamp not included. General task light distribution. Designed by Paolo Rizatto and Alberto Meda. Made in Italy. Head is 6 inches in diameter and the arms are 17 and 14 inches in length.

Shown in: Metal
