

WIRE METHOD A

WIRE METHOD B

**ASSEMBLY INSTRUCTIONS**

**WIRE METHOD A**

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Install the backplate (2) to the wall using the screw (1) .
4. Refer to the additional installation instructions included with the product for wiring and installation.
5. Install proper bulbs (not included) into each socket referring to the markings and/or labels on the fixture for maximum wattage.
6. Insert the rubber plug(5) into the hole of the backplate(2).
7. Restore power to the installation point and retain this sheet for future reference.

**WIRE METHOD B**

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Refer to the additional installation instructions included with the product for wiring and installation.
4. Install proper bulbs (not included) into each socket referring to the markings and/or labels on the fixture for maximum wattage.
5. Place the mounting plate (12) on the wall and mark where it will be installed using the key holes.
6. Drill the holes at the position where marked at the above step, and install the plastic anchors(13).
7. Install the mounting plate (12) on the wall using the wood screws (14) threaded into the plastic anchors (13).
8. Connect the label wire and the black wire together. Connect the ribbed wire and the white wire together. Use the fastener (6) to secure the wire (3).
9. Install the backplate (2) on the wall using the nut (11).
10. Install the wire casing (7) on the plastic anchors (9) and secure with the wood screws (10).
11. Install the wire casing cap (8) onto the wire casing (7).
12. Restore power to the installation point and retain this sheet for future reference.
