LED Concrete Ceiling

START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:
• This Kuzco LED fixture comes with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage), TRIAC or 0-10V type of dimmer is required.
• 120-277V input

Conduit Installation

Note: Conduit not included

1. Remove fixture from its original package

2. Remove conduit entry cover **(2a) (See Illustration 1)** and place conduit **(not included)** through wiring compartment **(1a)** hole

3. Attach wiring compartment **(1a)** to mounting surface with screws **(1d)** using template guide on page 2

4. Make proper electrical connections (**black** to **hot** "L", **white** to **neutral** "N", **ground** to **"GND")** with wire nuts **(1b)** provided in hardware package. Connect 0-10V dimming wire, DIM+ to purple, DIM- to gray, with wire nuts provided. Use wire nuts to cap the 0-10V wires if not used

5. Secure top plate **(4a)** to wiring compartment **(1a)** with screws **(1c)**, followed by mounting plate **(4b)** and secure to top plate **(4a)** with mounting plate screws **(4c)**

6. Twist fixture **(3a)** onto mounting plate **(4b)** and secure with fixture screw **(1e)**
