

WARNING!

Be sure electrical power is OFF before and during installation or maintenance.
The luminaire must be installed by a qualified electrician, in accordance with all applicable local codes.

Ensure that the rated luminaire voltage requirements are compatible with the available mains supply in which it will be installed.
All LEDs are included in your lamp. Never touch the LED surface with your bare hands as this may reduce the life of your LED.
Do not alter, relocate or remove any electrical component.

Line: Sfera
Family: Wall Lamp

Input voltage: 120 - 240V
Input frequency: 60 Hz
Isolation: Class II

Material: Natural Wood Veneer MDF and Globe

Turn off the electrical power before starting the installation, and keep it turned off until the installation is completed.

- ① Make the electrical connections in compliance with all the safety standards and local electrical codes.
This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product, and the hazards involved.
- ② Using the (S1) screws, fixate the junction box cover (J) and the crossbar (CB) into the junction box.
- ③ Install an A15 E26 light bulb, with a maximum wattage rating of 25W. While holding the metal brackets up, insert the glass globe on one of its ends, carefully sliding it in and releasing tension, taking care to not damage the globe. Repeat this process with the other side. Releasing the bracket, the globe will be attached to the holder.

Turn on the electrical power.

The luminaire is ready for use.
