

2301/US/GI Elastica

design studio habits, 2019

Elastica is a lamp that stretches between the ceiling and the floor, adaptable to different heights and space requirements. It can change slope through the special attachment fixed on the strip of elasticized fabric. It is composed of a strip of elasticized fabric that comes in different colors: red, yellow, grey, black, blue, supporting a flexible dimmable LED circuit. The lamp can be turned on and off simply by pulling the fabric strip. It is fixed at the extremities to a ceiling support and to a counterweight cylindrical base in metal painted of the same color. 24V dimmable driver on the plug.
