INSTALLATION INSTRUCTION FOR FIXTURE #2581, 2582, 2583, 2584-66A

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER. AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.

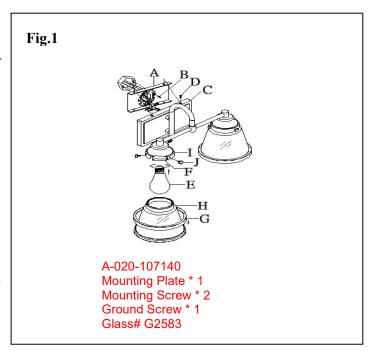

MOUNTING THE FIXTURE (FIG. 1)

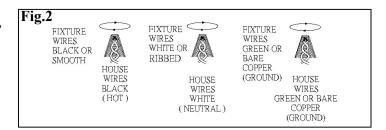

- Shut off the power supply at the fuse box or circuit breaker. If necessary, remove the old fixture from wall. Including the mounting hardware.
- Carefully remove the new fixture from the carton and check that all parts are included as shown in the illustration.
- 3. Attach mounting plate (A) to outlet box (Not included) using outlet box screws (B). The side of mounting plate marked "GND" must face out.
- 4. Attach fixture wall plate (C) over mounting plate (A) and secure with screws (D) tightly.
- Install the bulb (E) (Not included) in accordance with fixture's specifications. (DO NOT EXCEED THE MAXIMUM WATTAGE RATING!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).
- Place ring (G) over glass (H) and place glass (H) over socket (I) and secure with screw (J). Do not over tighten.

CONNECTING THE WIRES (FIG. 2)

- 7. Connect the electrical wires as shown in Fig.2, making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect fixture's ground wire to it. Otherwise, connect fixture's ground wire directly to mounting strap using green screw provided.
- 8. Tuck wire connections neatly into outlet box.

Your installation is now complete. Return power to the outlet box and test the fixture.

Note: Illustration (Fig. 1) & (Fig.2) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.
