

ASSEMBLY INSTRUCTIONS

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Unfold the arms of the fixture body (A) to desired locations.
4. Unravel the supply power and ground wires and pass them through the center holes of center tube (B), fixture body (A), rods (G), rod (H), loop (I) and canopy (K).
5. Thread the socket assembly(C), the center tube (B), and the fixture body (A) together as shown. Hand tighten until snug.
6. Confirm that the mounting holes on the large ring (D) align with the holes on the arm. Pass the screws (F) through holes on the arm and thread into the mounting holes on the large ring (D), until snug. Repeat process for remaining small ring (E).
7. Thread the rods (G) into the coupling at top of fixture body (A). Repeat process for remaining center rod (H). Hand tighten until snug.
8. Install the loop (I) into the top of rod (H).
9. Use the carabiner (J) to connect the loop (I) to the loop on the canopy (K) and twist the locking mechanism to secure.
10. Refer to the additional installation instructions included with the product for wiring and installation.
11. Install proper bulbs (not included) into each socket referring to the markings and/or labels on the fixture for maximum wattage.
12. Restore power to the installation point and retain this sheet for future reference.
