

ASSEMBLY INSTRUCTIONS

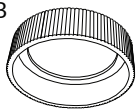

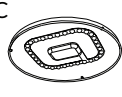

Tambo Flush Mount

3610832ASH

with color temperature selector feature

1. Carefully remove all parts from the box and place them on a clean surface.
Please refer to the list of items included inside the carton.
2. Turn off the power to your junction box.
3. Fix the ceiling mounting plate (A) to the ceiling with anchor screws (included).
4. Lay the LED module plate (C) into to the solid wood shade (B). Align and secure the module to the shade with the thumbscrews provided (found in the poly bag).
5. Connect the wires (black to black, white to white and ground to ground using the wire nuts (included)).
6. Align the holes in the LED module plate (C) with the ceiling mounting plate (A) with the mounting board using the screws provided, then secure it to the ceiling using the flower-head screws provided (D).
6. Adjust your color temperature to the ideal setting (2700K warm, 5000 cool).
7. Rotate the diffuser lens (E) to lock it onto the shade assembly.
8. Plug into a surge protected 110v outlet and enjoy the beautiful light!
