IMPORTANT INFORMATION

- This product is ETL listed for indoor dry locations.
- This product can only be installed to a 4.5" X 2.5" rectangle electrical box (gangbox).

SAVE THESE INSTRUCTIONS!

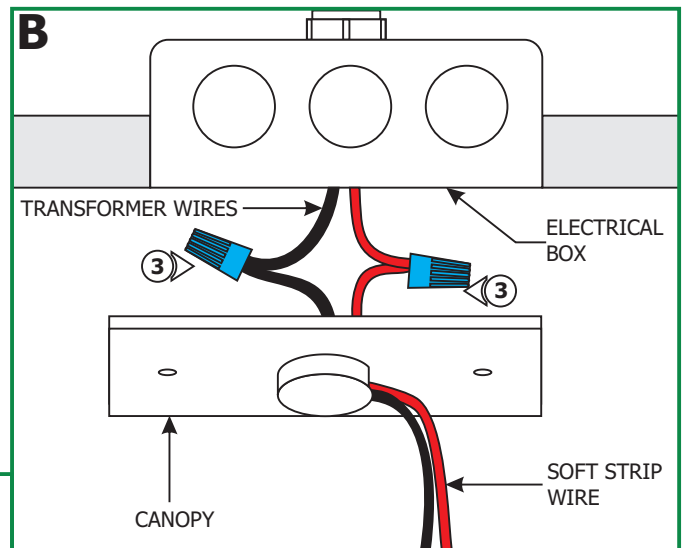

Install the Canopy Cover

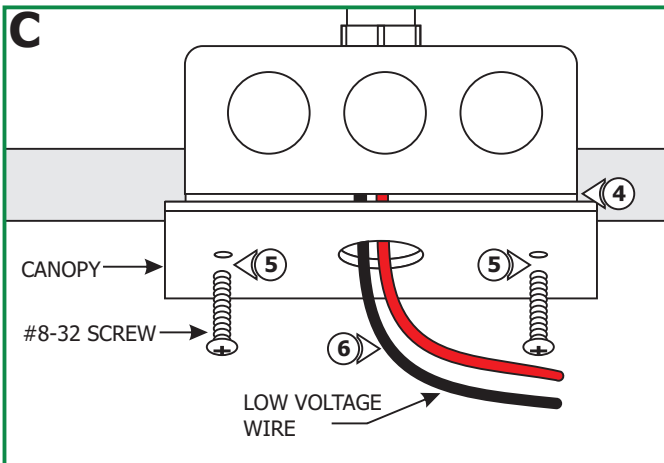

NOTE: The low voltage DC power supply wires should be present in the electrical box before proceeding with the steps below. Refer to the power supply instructions for more details.

- 1: Feed the soft strip power wires through the canopy center hole.
- 2: Snap the cap onto the canopy center hole and the soft strip wires.

- 3: Connect the black and red soft strip power wires to the black and red transformer wires respectively with wire nuts.

- 4: Place all wire and wire nut connections inside the electrical box.
- 5: Secure the canopy to the electrical box with the two #8-32 provided screws.
- 6: Refer to the instructions provided with the soft strip to connect the power to soft strip.
