Installation Instructions for Flex Neon LRF7 24VDC Outdoor Wet Location

FN-LRF7-__

IMPORTANT INFORMATION

- This instruction shows a typical installation.
- The Outdoor Flex Neon is an IP67 rated wet location fixture featuring water tight barrel connections.
- This product bends right to left or left to right.
- This product must be installed by a qualified electrician and in accordance with local electrical codes.

SAVE THESE INSTRUCTIONS!

Section One: Install the Flex Neon

NOTE: Omit this Section if using the Flexible Aluminum Channel. Refer to Section Three.

- 1: Determine the location for the Flex Neon.
- 2: Mark the location of the mounting clips. Mounting clips must be maximum 12" apart from each other (measure from the center of the mounting clip).

NOTE: Steps 3 and 4 are for drywall mounting. Omit these steps if mounting to a wood surface directly.

- 3: Tap the anchors onto the marked points up to the threaded portion with a hammer.
- 4: Screw in the threaded portion of the anchors with a Phillips screwdriver.

- 5: Line up the mounting clips to the anchors and secure it to the anchors by tightening the #8-32 screw to each clip.

6: If necessary, bend the Flex Neon **ONLY** right to left or left to right.

7: Insert the Flex Neon into each mounting clip.

Section Two: Connect to Power

NOTE: Outdoor electrical connections must be made inside a waterproof junction box or using waterproof wire nut connections.

NOTE: Steps 1 through 3 are for the Wet Location Junction Box with Power Cable.

- 1:** Refer to the instructions provided with the wet location junction box to connect to the power supply.
- 2:** Align and push the male barrel connector of the Flex Neon into the female barrel connector going to the power supply.
- 3:** Twist the connector nut to lock in place.

NOTE: Omit steps 4 through 7 if using wet location junction box.

- 4:** Cut the end of the power cord that is going to be connected to power and discard the unused connector.
- 5:** Use AWG wire trimmers to remove the outer insulation from wire harness where electrical connection will be made.

- 6:** Connect the red wire of the power cable to the +24VDC wire of the power supply using a wire nut.
- 7:** Connect the black wire of the power cable to the -24VDC wire of the power supply using a wire nut.
- 8:** Refer to the wiring diagram on page 6 and the instructions provided with the power supply to complete the installation.

9: To connect additional Flex Neon, align and push the female barrel connector of one Flex Neon into the male barrel connector of the next one.

10: Twist the connector nut to lock in place. Repeat for any additional sections.

NOTE: Ensure that additional Flex Neon are properly supported and powered.

Section Three: Install the Flex Neon with Flexible Aluminum Channel

2: Determine the location of the Flexible Aluminum Channel and mark every fourth tab screw holes.

NOTE: The Flexible Aluminum channel bends in both directions. For simple curves or circles, it is recommended to bend the channel toward the tabs.

NOTE: Steps 3 and 4 are for drywall mounting. Omit these steps if mounting to a wood surface directly.

3: Anchors are not provided. Tap the anchors onto the marked points up to the threaded portion with a hammer.

4: Screw in the threaded portion of the anchors with a Phillips screwdriver.

5: Secure the Flexible Aluminum Channel to the anchors using screws.

6: Identify the side of the Flex Neon with a white stripe that indicates the location of the LED Strip.

7: Place the side with LED Strip on an angle on top of the Flexible Aluminum Channel.

8: Slightly push down the side without LED Strip inside the Flexible Aluminum Channel.

9: Carefully push the Flex Neon completely inside the Flexible Aluminum Channel.

10: Remove the backing from the channel cover. Firmly press down on the Flexible Aluminum Channel tabs while removing the rest of the backing.

11: Refer to Section Two to connect to power.
