## Section One: Install the Fixture

**A**

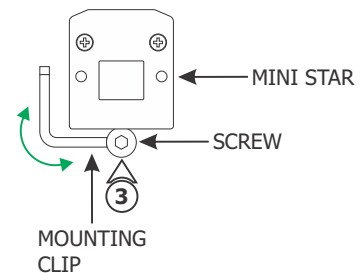

SURFACE

**1:** Determine the location of the Mini Star fixture.

**2:** Mark the location of the mounting clips on the surface.

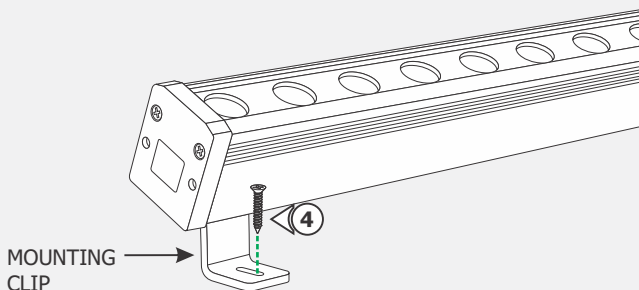

**B**

**3:** Adjust the mounting clip by loosening the screw on the side of the clip and rotating into position. Tighten the screw to secure in place.

**C**

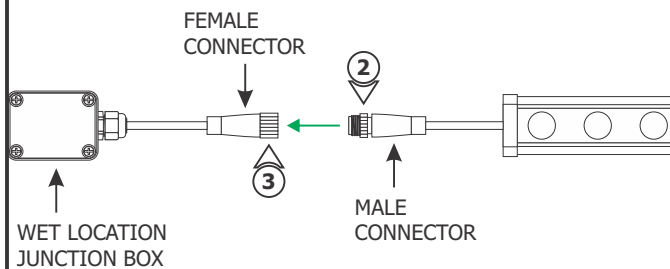

SURFACE

**4:** Secure the mounting clips to the surface (mounting hardware not included).

## Section Two: Power the Fixture

**D**

**NOTE:** Outdoor electrical connections must be made inside a waterproof junction box or using waterproof wire nut connections.

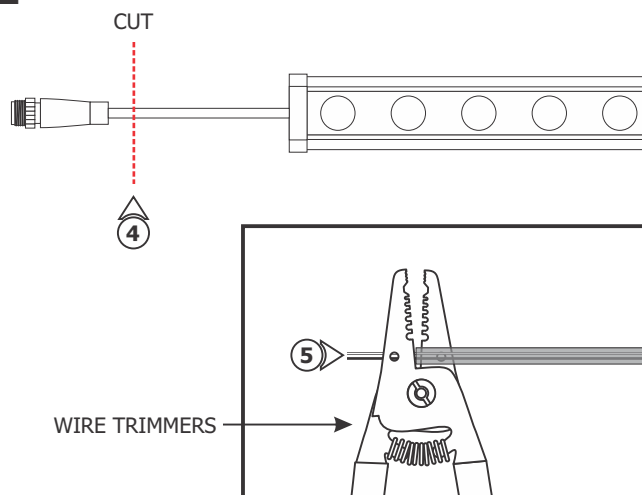

**NOTE:** Omit steps 1 through 3 if not using a wet location junction box.

- 1:** Refer to the instructions provided with the wet location junction box to connect to the power supply.
- 2:** Align and push the male connector of the fixture into the female connector going to the power supply.
- 3:** Twist the connector nut to lock in place.

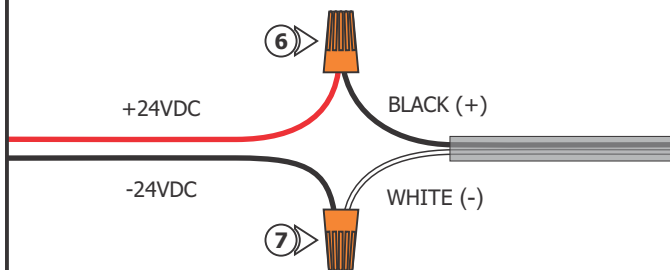

**NOTE:** Omit steps 4 through 7 if using a wet location junction box.

- 4:** Cut the end of the power cord that is going to be connected to power and discard the unused connector.
- 5:** Use AWG wire trimmers to remove the outer insulation from wire harness where electrical connection will be made.

**E**

**F**

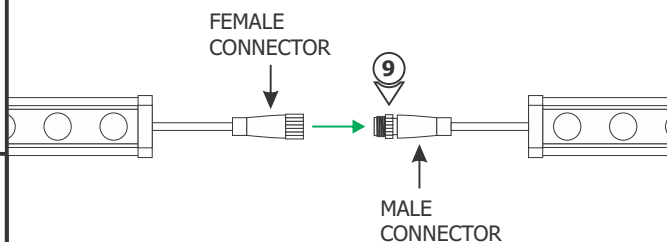

- 6:** Connect the black fixture wire to the +24VDC power supply wire using a wire nut.
- 7:** Connect the white fixture wire to the -24VDC power supply wire using a wire nut.
- 8:** Refer to the wiring diagram on page 3 and the instructions provided with the power supply to complete the installation.

**9:** To connect additional fixtures, align and push the female connector of one fixture into the male connector of the next one.

**10:** Twist the connector nut to lock in place. Repeat for any additional sections.
