Installation Instructions for **Tubo Large Downlight Track Head**

T24-TUBLD- _

IMPORTANT INFORMATION

- This product is suitable for indoor locations.
- Ensure that power to the electrical box is **OFF** before beginning installation.
- These lighting fixtures must be used with PureEdge Lighting 24 volt track systems only.
- This product is dimmable when the system is powered with PureEdge 0-10 volt, ELV and Universal power supplies.

SAVE THESE INSTRUCTIONS!

Section One: Replace the Lens

1: Use a pen or small Allen wrench to loosen the lens holder.

2: Unscrew the lens holder counter-clockwise and remove it from the fixture.

3: Unscrew the lens holder nut counter-clockwise and remove the lens, film, and spacer.

4: Replace the lens. Place the film and spacer in front of the lens and into the lens holder.

5: Screw the lens holder nut back into the lens holder clockwise to secure in place.

6: Screw the lens holder back clockwise to secure in place.

Section Two: Install the Track Head for Track Systems

NOTE: Refer to the instructions provided with the track to install the system.

1: Insert the track connector into the track.

2: Slightly rotate the fixture to access the slotted screws on the track connector. Tighten the slotted screws with a flat head screw driver to secure in place.

3: Rotate the fixture to be centered with the track.

4: Turn the power on.

NOTE: This fixture consumes **15** watts and contains integrated LED lamps which are rated for 50,000 hours.
