2. Remove the bracket (A) from the lamp.

3.

4.

3. Connect the wires and fix the lamp to the bracket.
4. To turn the lamp on or off, use the switch.

Lamps without the IP mark are classed as IP20 and are designed for general indoor use, except wet areas (bathrooms, etc.)

- Lamps with the IP mark are designed for outdoor use and in wet areas. (E.g. IP54)
- They offer guaranteed protection to people and animals against electric shocks:

Class I: through single electrical insulation and an earthing conductor once correctly connected.

Class II: through double electrical insulation.

Class III: these kinds of lamps should be connected at very low voltage levels (generally 12V); therefore there is no risk.

- Lamps with this symbol, or without any symbols, can be mounted directly onto normally inflammable surfaces.

- Lamps with this symbol cannot be mounted directly onto normally inflammable surfaces.

- The safety of this lamp is guaranteed by using a maximum wattage bulb that does not exceed the figure displayed visibly on the lamp.

- The product cannot be treated like conventional domestic waste; it must be taken to the appropriate recycling station for electrical and electronic equipment.
