

PH 2-1 WALL

The fixture is designed based on the principle of a reflective three-shade system, which directs the majority of the light downwards. The shades are made of mouth-blown opal three-layer glass, which is shiny on the top and sandblasted matte on the inside, giving a soft and diffuse light distribution.

Poul Henningsen

Poul Henningsen was born in Copenhagen by the famous Danish writer Agnes Henningsen. He never graduated as an architect, but studied at The Technical School at Frederiksberg, Denmark from 1911-14, and then at Technical College in Copenhagen from 1914-17.

Product description

PH 2/1 wall is one of the iconic fixtures recognized throughout the world. It is a small-scale pendant of gently sloped glass shades with a lustrous metal socket housing on top. The iconic design is based on the principle of a reflective three-shade system, which directs the majority of the light downwards. The shades are made of handblown, opal white, three-layer glass, which is glossy on top and sandblasted matte on the underside, giving a soft and uniform light distribution. Part of a family including indoor and outdoor products.

Mounting

Mounted directly to finished surface over a 4" octagonal junction-box. Switch: On/off switch on the wall plate.

Light description

Light distribution is mostly downward with the glass shades casting a soft glow horizontally and upwards. The curvature of the shades and their positions limit the direct view of the lamp to reducing glare. Provided with a candelabra base socket for the customer to provide their desired lamp.

Design

Poul Henningsen

Material

Shades: Handblown white opal glass. Wall box: High lustre chrome plated, spun brass. Suspension: High lustre chrome plated, spun aluminum. Arm: High lustre chrome plated, brass.
