PURE EDGE
Pure Smart Lighting

Recesses into 5/8" Dry Wall

Let the Drywall be Your Canvas

DESCRIPTION

PureEdge pioneered the TruLine 1.6A DIY (Do-It-Yourself) plaster-in, 24VDC LED system that recesses within 5/8" drywall, without any joist modification. Redefining the relationship between lighting and interior design, this innovative and highly efficient system blends seamlessly into the drywall, becoming part of the architecture. The TruLine 1.6A DIY system makes creating complex configurations simple by using pre-formed components, streamlining the installation process. The slim extrusions, LED strips, and lenses are field-cuttable, running as long as 40' before re-feeding. Multiple runs of channel mount flawlessly together providing smooth and glare-free general illumination using two strips of designer-grade color rendering LEDs (95+ CRI). With the ability to run in vertical, horizontal, and diagonal directions or wrap both inside and outside corners, the compositions are truly endless. TruLine 1.6A is offered in a broad range of wattages and color temperatures from 2400K through 4000K, Warm Dim (**27D** or **30D**), Pro Dim (27PD or 30PD), Tunable White (**2K6K** or **27K6**), Dynamic **RGB**, **RGB+White** in 2000K (special order in 27K, 30K and 40K), and TruColor™ **RGBTW** Color Changing RGB with Tunable White 1500K-6500K. Influenced by simplicity and elegance, the Truline 1.6A plaster-in system brings together a modern and dynamic appearance to residential and commercial environments, offering unlimited creativity, and empowering you to design one-of-a-kind, personalized spaces. Let the drywall be your canvas. Coordinate installation with electrical and drywall contractors. Includes a 5-year pro-rated warranty. For custom designs and quotes, send drawings to design@PureEdgeLighting.com.

DESIGN NOTE

TruLine 1.6A can be installed on a single surface, join runs on multiple planes from wall to ceiling, or from one wall to an adjacent wall. Use TruLine 1.6A Do-It-Yourself (**DIY**) to create desired configurations, including Mitered Picture Frame and Outside or Inside Corners for Room Wrapping installations. Create square or rectangular compositions with **TruQuad 1.6A**.

PICTURE FRAME INSTALLATION DESIGN NOTE

Create 90° turns on a single surface with L-Picture Frame Channel Connectors (**TL1.6A-L**) and/or L-Picture Frame Power Channel Connectors (**TL1.6A-LP**). The LED Strips are installed on the side of the channel and bends within L-Shaped Channel Connectors to create continuous illumination on walls and ceilings.
ROOM WRAPPING DESIGN NOTE

Room Wrapping is the style of installation in which you can create 90° angles with Inside Corner Channel Connectors (**TL1.6A-IC**) and Outside Corner Channel Connectors (**TL1.6A-OC**). The LED Strip is installed flat on the back wall of the channel, and bends within the inside or outside corners for seamless illumination across surfaces.

CAN'T STOMP ME OUT

Our Low Voltage Stomp Strip is highly durable, designed to withstand the harsh elements of a job site, and precision engineered to provide superior color rendering up to 94+ CRI. Warm Dim technology **(27D & 30D)** mimics an incandescent atmosphere by decreasing the color temperature as you dim. Our Warm Dim strips can be dimmed all the way down to a soothing amber hue at 1800K, reminiscent of candlelight along the halogen curve. Stomp Strip is used for our **DIY** (Do-it-Yourself) fixtures and systems.

DESCRIPTION

Pure Smart by PureEdge **TruColor**™ technology uses five channels of tunable LEDs, composed of **RGBTW** red, blue, green, and Tunable White (**1500K-6500K**). With our precision-engineered, proprietary color mixing, we produce one of the widest, most accurate spectrums available, giving our customers access to the warm glow of the sunset (1500K-2400K golden hour) to the pure white light of the mid-day sun (5700K) and everything in between. TruColor™ LEDs achieve an average CRI-Color Rendering Index of 94+ and a Duv of +-0.0021 in relation to the blackbody curve at any point on the spectrum of tunable white CCT. Dynamic Color Changing functionality provides millions of possibilities for intricate customization, rich saturated secondary colors, and unprecedented ease of installation, making **RGBTW** the ideal choice for residential and commercial applications. TruColor™ **RGBTW** adds more than just decorative flexibility; it also helps to support a healthy Circadian Rhythm and well-being. Let TruColor™ transform your space and the people within it. 24VDC Pure Smart Remote Power Supplies required. Includes a 5-year pro-rated warranty. For custom quotes and layout assistance, send your drawings and ideas to our design team: design@PureEdgeLighting.com.
