

VANISHING POINT 120VAC PENDANT CONNECTION CEILING CORD GRIP SYSTEM

DESIGNED BY GREGORY KAY | ASSEMBLED IN AMERICA | US PATENT PENDING

REV 04.15.25

V-C120A-WH
Vanishing Point 0.2" Opening Plaster-In

DESCRIPTION

The Vanishing Point 120VAC Pendant Connection System is a groundbreaking innovation, changing the way the world sees luminaires. The cord grip system is the only genuinely trimless and flush, allowing pendants to disappear into the ceiling. Mounting options available for both drywall and millwork ceilings, designed for 120VAC cord suspended fixtures. The epitome of refinement, the Vanishing Point Cord Connection System, eliminates the unattractive, bulky, and outdated canopy achieving a minimal and continuous architecture. Corded pendant/suspension fixtures sold separately. Patent Pending. For custom quotes and layout assistance, send your drawings and ideas to our design team: design@PureEdgeLighting.com.

DRYWALL MOUNTING

V - Drywall Plaster-in option has no visible canopy outline, fixture cord vanishes in to the ceiling. Pendant/Fixtures sold separately.

C120A - 0.25" diameter opening for cord, accommodates fixtures up to 5lb

C120B - 0.25" diameter opening for fixtures with cord and 1/16 Aircraft cable, accommodates fixtures up to 10lbs

MILLWORK MOUNTING

V2M - Connection point at ceiling 2.0" canopy sits flush in Millwork ceilings for a clean look. Pendant/Fixtures sold separately.

V-C120B-WH
Vanishing Point 2" Flush, Magnetic Canopy for drywall. For fixtures with 0.3" cord and aircraft cable.

APPLICATIONS

Designed for indoor use only. Ideal applications in residential, commercial, retail and hospitality environments include not limited to kitchens, living rooms, dinning rooms, offices, conference rooms, architectural spaces, lobbies, large-scale public spaces, hotels, restaurants and luxury health spas.
