Parallel

120 x 60

WOUD

**When designing the Parallel coffee table,
I drew inspiration from the display showcases
found in museums and the idea of how these
could be adapted for a domestic environment.
By leveraging glass, the space between the
horizontal planes serves as an exhibition
area for everyday objects. It is like having
your own personal museum display case at
home.**

A handwritten signature in black ink, featuring a large, loopy initial 'M' followed by a series of smaller, connected loops and a long horizontal stroke extending to the right.
