

CARE INSTRUCTIONS

Use and care of your lamp.

You have just purchased an original handmade product by LZf. Your lamp is made out FSC® certified natural wood with our patented veneer finish Timberlite®. This treatment both protects and safeguards the wood veneer against breakages.

Depending on the type of lamp use a feather duster, soft cleaning cloth or damp cloth for cleaning. On our more delicate shades, like those made from wood strips, a feather duster or an air blower is preferable. In our more solid shades a damp cloth may be used. Clean only the flat surface of the veneer with the cloth, and please avoid any moisture contact along the edge of the veneer.

Light bulbs

We recommend using energy-saving light bulbs, such as eco halogen, CFL or LED. Please refer to the instruction manual or visit our web www.lzflamps.com to make sure you are using the right type of light bulb. You can buy light bulbs directly from our company; check our catalogues for availability.

Precautions

Avoid direct sunlight, strong indirect sunlight and moisture on the lamp. Unplug the lamp before cleaning or changing the light bulb. Servicing of the electrical installation should only be performed by qualified electrical personnel by LZf.
