INSTALLATION INSTRUCTIONS

C-10746 Branch Pendant 60" C-10747 Branch Pendant 72" C-10748 Branch Pendant 84"

IMPORTANT!

AT ALL TIMES WIRING TO BE DONE PER NATIONAL ELECTRICAL CODES (NEC) OR APPLICABLE LOCAL CODES. READ ALL INSTRUCTIONS THOROUGHLY. TURN OFF POWER AT CIRCUIT BREAKER OR FUSE BOX BEFORE PROCEEDING.

STEP 1

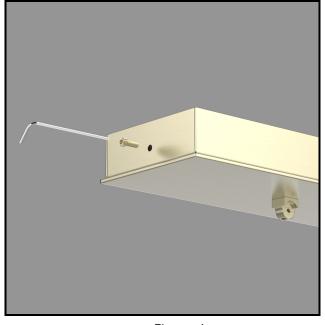

• Carefully remove fixture from packaging. Avoid using a sharp blade on the packaging, as doing so may result in damage to the fixture or finish. Place fixture on a padded surface such as a blanket.

STFP 2

• Turn off power at fuse box or circuit breaker.

STEP 3

- Using the included hex key, remove the socket head screws from canopy ends. (Figure 1)
- Separate the painted mounting bracket from canopy. Set canopy aside.

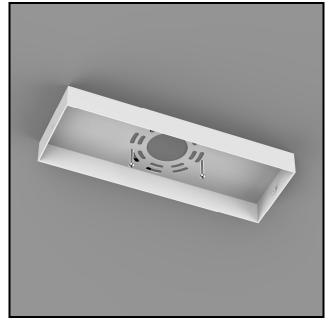

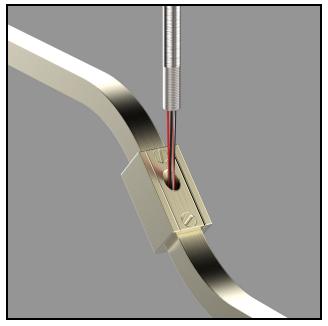

Figure 1 Figure 2

• Install mounting bracket onto ceiling electrical box with screws provided. (Figure 2)

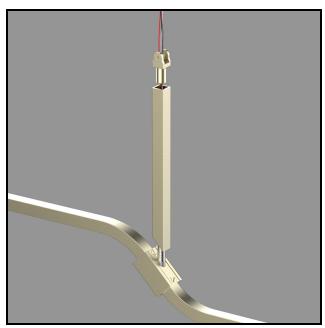

Figure 3

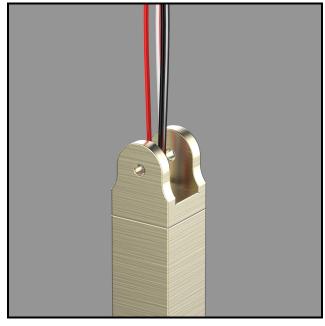

Figure 4

STEP 5

- Carefully feed the fixture wiring up through the steel tube. (Figure 3)
- Thread tube into the main body of the fixture, until it bottoms out.

STEP 6

- Slide square stem casing over steel tube. (Figure 4)
- Secure in place by threading saddle onto end of tube. Be sure saddle aligns with the side of the stem casing, and aligns with the fixture itself. (Figure 5)

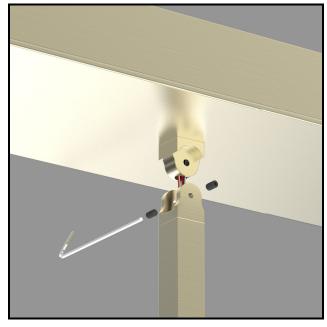

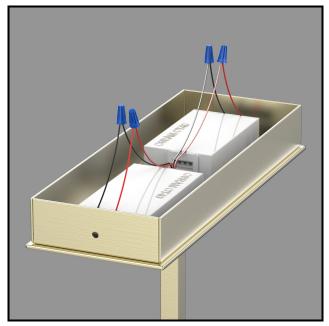

Figure 6

STEP 7

- Carefully align the stem saddle from Figure 5 with the canopy anchor block. (Figure 6)
- Secure in place with a set screw from each side. Use included hex key.

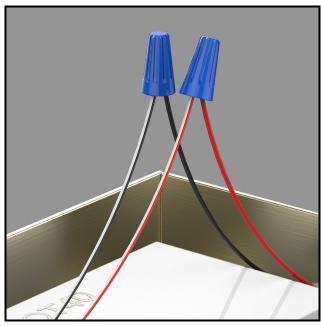

Figure 7 Figure 8

STEP 8

- Use a second person for assistance, or lay fixture on its side, on a padded surface.
- Make wire connections from the LED source to the two drivers in the canopy. (Figure 7)
- Connect the red and black fixture wires to the red and black wires on one of the drivers.
- Use blue or gray twist-on wire connectors.
- Connect the red/white striped wire and black/white striped wire to the red and black wires on the second driver.
- Detail view shows the striped wiring connecting to the second driver. (Figure 8)

STEP 9

• Lift fixture close to the ceiling. Carefully support the main body and canopy to prevent damage.

STEP 10

- Make main wire connections using included orange twist-on connectors. (Figure 9)
- Connect the white fixture lead to the neutral supply wire (typically white).
- Connect the black fixture lead to the hot supply wire (typically black).
- Connect the copper fixture wire to the ground wire or ground terminal in the outlet box.
- If installing on a 0-10V dimming system, connect the purple fixture wire to the purple supply wire.
- Connect the gray fixture wire to the gray supply wire.
- If dimming is not required, cap purple and gray wires separately and tuck into the canopy.

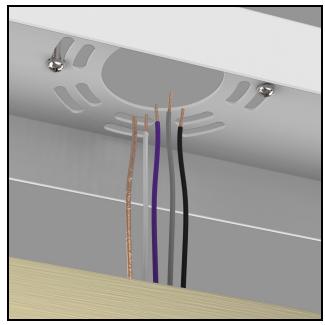

Figure 9 Figure 10

STEP 11

- Align canopy over mounting bracket and lift fixture flush to ceiling. (Figure 10)
- Secure canopy with the screws that were removed in STEP 3.

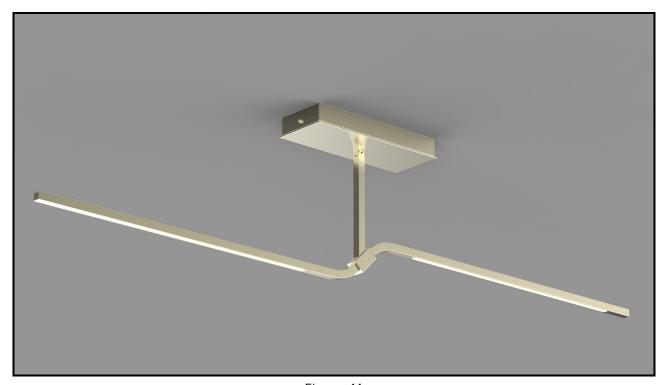

Figure 11

STEP 12

Restore power to circuit. Turn on fixture.
