NOTA / NOTE:

En algunos casos, puede aparecer parpadeo.
Rogamos comprobar que el dimmer utilizado esté en la lista de compatibilidad y que su carga mínima se corresponde con la del dimmer.
Para eliminar el parpadeo, o quitarlo del rango de uso deseado, adaptar el dimmer con la regulación que habitualmente está en el frontal, detrás de la tapa decorativa. Esto suele ser suficiente aun para muchos dimmer no compatibles.
Si el efecto continuara, póngase en contacto con Bover.
Solamente podremos reclamar al fabricante si su dimmer aparece en la lista de compatibilidades.

Flickering may occur in a few cases.
Please first check that the used dimmer is in the compatibility list, and that it's load corresponds with the minimum load of the dimmer.
To eliminate flicker or to take it out of the desired range of use, regulate the dimmer with the means that it usually has in the frontal plate, just behind the decorative frontal frame. This is usually enough even for several non compatible dimmers.
If the effect doesn't disappear please get in contact with us.
We will be able to claim to the manufacturer only if your dimmer appears on the list of compatibilities.
