

Recommended Dimmers

For regions including Canada, Mexico and the USA We aim to test the most widely used dimmers on the market to guarantee the best possible performance with our LED bulbs and Light Engines.

The phase-control dimmers below have been tested in our London lab and proven themselves to deliver smooth, responsive and stable dimming from full power down to zero or near-zero light output.

For best results, ensure your electricity supply is stable and free from transients. If you are interested in using another dimmer or require technical assistance, please contact customerservice@tala.co.uk

RECOMMENDED

Arditi 1004P – Best inline pushbutton dimmer for all Tala lamps
