Install the Standoff
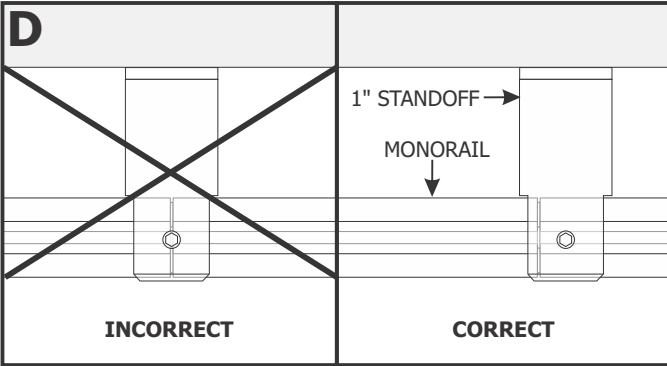

A

CEILING

ANCHOR

1: Hold the Monorail section against the ceiling (this may require more than one person) or use a plumb bob to mark the standoff locations onto the ceiling.

2: Tap the anchors onto the marked locations up to the threaded portion with a hammer.

3: Screw the threaded portion of the anchors in with a Phillips screwdriver.

B

#8 SCREW

1" STANDOFF

4: Mount the standoffs onto the anchors with the #8 screws provided. **Make sure that the cut out portion of the standoffs lines up with the Monorail.**

C

1.5MM ALLEN WRENCH

MONORAIL

M3 SET SCREW

5: Slide Monorail into the cut out portion of the standoffs. Hold the Monorail against the standoffs (this may require more than one person) and tighten the M3 set screw on each standoff with the 1.5mm Allen wrench.

1" STANDOFF →

MONORAIL ↓

INCORRECT

CORRECT

NOTE: Do not install the Monorail 1" standoff directly centered onto where the Monorail sections are joined together. The set screw will come in contact with the conductive joining connectors which will cause a short in the system. The set screw should come into contact with the Monorail insulator to support the rail properly.
