

Description: TruLine 1.6A BIY (Build-It-Yourself) allows for creating more complex configurations using Pre-Formed Components for simplifying the installation process. The versatile 24VDC linear plaster-in LED system, creates glare-free, indoor architectural lighting. The system recesses into 5/8 inch thick drywall without joist modification. May be secured to studs that are spaced 13 – 24 inches apart, or between studs with mounting clips provided. TruLine 1.6A is sold in 1 foot increments up to 40 feet (5WDC, white LEDs only), 20 feet (10WDC, white, 2K4K or RGB LEDs) or 16 feet (12WDC, RGBW) and may be field-cut to any length. Several color temperature options are available, including 22K – 57K (ELV/010), Warm Dim (ELV), Tunable White (ELV/010/DMX), RGB and RGBW (DMX). High CRI commercial-grade white or dynamic color-changing LED Soft Strip projects a clean line of light. Coordinate installation with electrician and drywall contractors. Includes a 5-year pro-rated warranty.

Applications: Indoor damp or dry locations only. General illumination and architectural accent for kitchens, offices, hospitality, retail, residences, libraries, hallways, and bath/vanity

Picture Frame Installation Design Note:

TruLine 1.6A can be installed on a single surface (like a wall or ceiling), or on multiple planes that join runs from wall to ceiling, or from one wall to an adjacent wall. Add BIY Pre-Formed Components to create desired Picture Frame Installations.

Picture Frame Miter is the style of installation in which the electrician may create 90-degree turns on a single surface with L-Picture Frame Channel Connectors (TL1.6A-L) and/or L-Picture Frame Power Channel Connectors (TL1.6A-LP). The LED Soft Strip is installed on the side of channel and bends within L-shaped channel connectors to create continuous illumination on a wall or a ceiling.

Room Wrapping Design Note: TruLine can be installed on a single surface (like a wall or ceiling), or on multiple planes that join runs from wall to ceiling, or from one wall to an adjacent wall. Add BIY Pre-Formed Components to create desired Room Wrapping Installations.

Room Wrapping is the style of installation in which the electrician may create 90-degree angles with Inside Corner Channel Connectors (TL1.6A-IC) and/or Outside Corner Channel Connectors (TL1.6A-OC). The LED Soft Strip is installed flat in the back wall of the channel; and bend within inside or outside corners for seamless light across surfaces.

Pre-Formed Components: 8 Foot Channel and Lens, End Feed Power Channel Connector, Center Feed Power Channel Connector, L-Picture Frame Power Channel Connector, Junction Box, Outside Corner Channel Connector, Inside Corner Channel Connector, Channel Joiners, Take-Up Box, Channel Solderless Push & Light Straight Joiner Connector
