

**DESCRIPTION**

TruTrack is a patented recessed 24VDC two power feed/circuit track (one circuit - track, second circuit - LED soft strip) with a linear plaster-in LED system that is only as thick as the 5/8" drywall, eliminating the concern of hitting studs, and allowing complete flexibility to make turns along the ceiling.

**FEATURES**

- Designed for combining recessed Track Spots and adding LED Soft Strip for a clean modern look. System may be switched and dimmed as a Single Circuit or separately as a 2-Circuit System. Track heads can be powered with a maximum load of 200 watts per circuit and LED soft strip can be powered with a maximum of 100 Watt power supply for each circuit. Remote power supply can be located up to 40ft away from the power feed.
- Linear Plaster-in LED and Track System can be installed on a single surface (Wall or Ceiling), or on multiple surfaces going from the Wall to the Ceiling.
- Pre-Formed components will help you to create desired configurations including Picture Frame and Room Wrapping Installations
- LED Soft Strip is sold in 1' increments 40' maximum length, up to 100 watts supply before re-feeding.
- Track Head Lumen Output up to 1356 Lumens (12.5 Watts), with 4 different Beam Spreads to choose from.
- Track Power Feeds may be ordered in End, Center, L, T, and X, up to 100 Watts before re-feeding, 200 Watts at Center Feed.
- Recessed TruTrack Channel is available in 2', 4', 6', and 8' field-cuttable lengths.

- Two White Plastic Opaque Slot Covers and one Transparent Lens Slot cover are included with TruTrack Channel to hide Recessed Track Slot and LED Dots. Opaque Cover may be painted to match the ceiling, order Transparent Cover separately when adding Soft Strip.
- #10 Gauge Busbar to help eliminate voltage drop
