Installation Instructions for Vanishing Point 24 Volt Millwork Flush-Mount Canopy Fast Jack Connection

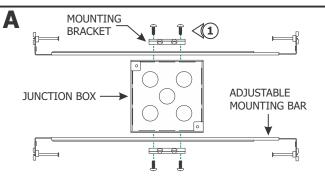

V2M_-FJ24-_

IMPORTANT INFORMATION

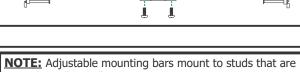

- This instruction shows a typical installation.
- This product is ceiling mount.

SAVE THESE INSTRUCTIONS!

Section One: Install the Junction Box

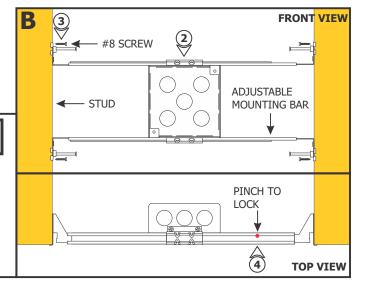

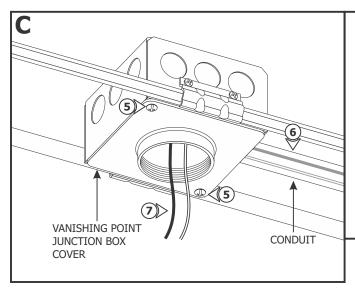

1: Mount each adjustable mounting bar to one side of the junction box and secure them with the mounting brackets and two Phillips screws provided.

NOTE: Adjustable mounting bars mount to study that are spaced 14.5" to 25" apart.

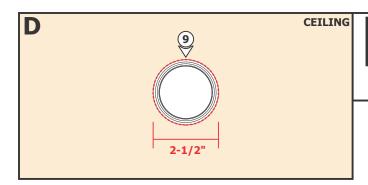

- **2:** Select the location between the two studs for the junction box to be mounted.
- **3:** Place the adjustable mounting bar tabs between the studs. Secure the adjustable bars to the studs with the #8 screws.
- **4:** Pinch anywhere on the inner edge of the mounting bars to lock in place.

- **5:** Install the Vanishing Point junction box cover to the junction box using two #8-32 screws.
- **6:** Remove a knockout to install a conduit into the junction box. Install conduit(s) (if required by local electrical code).
- 7: Run the line voltage wires to the junction box.
- **8:** If using remote power supply, then run the low-voltage 24V wires coming from the remote power supply to the junction box.

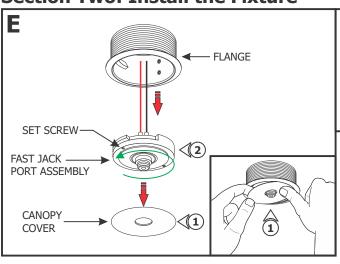

NOTE: Ensure remote power supply wires are present in the junction box. Refer to instructions provided with the power supply.

NOTE: Vanishing Point Millwork needs to be installed onto a minimum 5/8" to maximum 7/8" thick wood/surface. The cut out slot must be 2-1/2" in diameter.

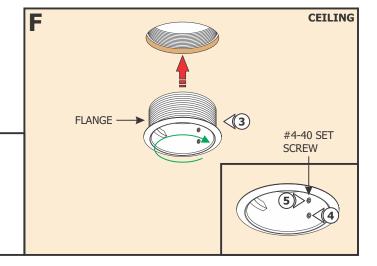

9: Use a 2-1/2" hole saw to cut out the surface where the junction box opening is located.

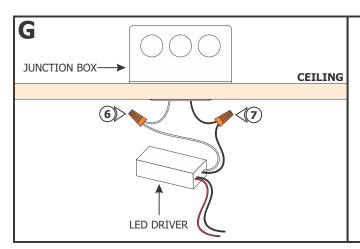

Section Two: Install the Fixture

- 1: Use fingers to push on the perimeter of the canopy cover until it slightly rocks and lift the cover to remove it from the assembly.
- 2: Loosen (**Do Not Remove**) the #4-40 set screws on the Fast Jack Port assembly using a 0.05" Allen wrench and rotate the Fast Jack Port assembly counter clockwise to remove from the flange.

- **3:** Screw the flange clockwise into the junction box cover, ensuring the flange is tight.
- **4:** If the surface is 5/8" thick, tighten the bottom #4-40 set screw inside the flange using a 0.05" Allen wrench.
- **5:** If the surface is 3/4" and thicker, tighten the top #4-40 set screw inside the flange using a 0.05" Allen wrench.

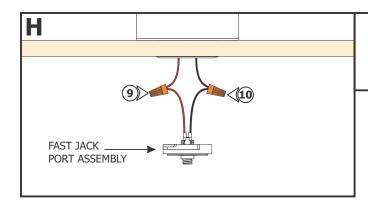

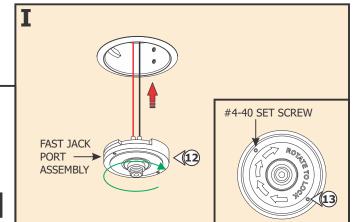

NOTE: Steps 6 through 8 are for the 24V power supply included inside the junction box. Omit these steps if using remote power supply.

 $\underline{\textbf{NOTE:}}$ Make sure the junction box is grounded in accordance to local electrical codes.

- **6:** Connect the white LED driver wire to the neutral power wire with a wire nut.
- **7:** Connect the black LED driver wire to the hot power wire with a wire nut.
- **8:** Place the LED driver and wire nut connections inside the junction box.

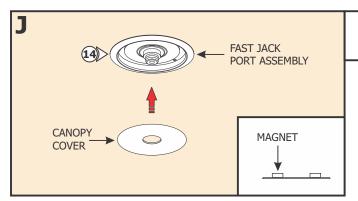

- **9:** Connect red wire of the Fast Jack Port assembly to the +24VDC power supply wire using a wire nut.
- **10:** Connect the black wire of the Fast Jack Port assembly to the -24VDC power supply wire using a wire nut.

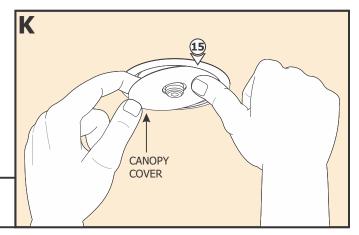

- **11:** Place all wire nut connections inside the junction box.
- **12:** Insert the Fast Jack Port assembly into the opening and rotate clockwise to lock in place.
- **13:** Tighten the #4-40 set screws using a 0.05" Allen wrench to secure in place.

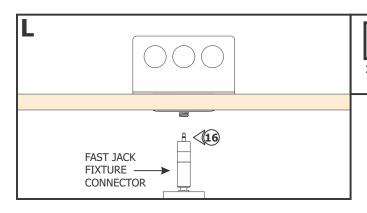

NOTE: Test the fixture.

14: Place the canopy cover over the Fast Jack Port assembly. The magnets on the back will keep the canopy cover in place.

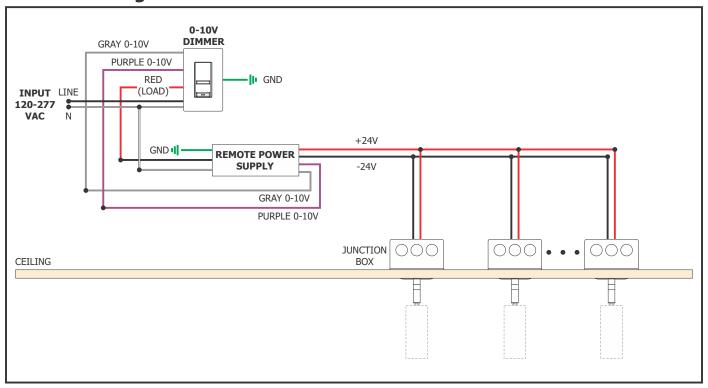

15: If necessary, use fingers to push on the perimeter of the canopy cover until it slightly rocks and lift the cover to remove it from the assembly.

<u>CAUTION:</u> Risk of Fire: Do not load the port greater than included power supply rated wattage (15W or 60W).

16: Use fingers to tighten the Fast Jack connector into the Fast Jack port.

Installation Instructions for Radiant Medium Vanishing Point and Radiant Medium Track Head

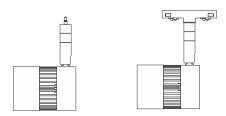

FJ24-RADM-_

T24-RADM-

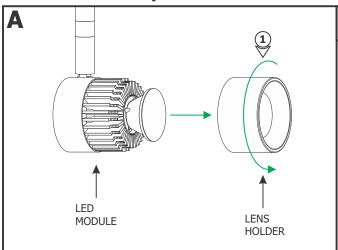

IMPORTANT INFORMATION

- This product is suitable for indoor locations.
- Ensure that power to the electrical box is **OFF** before beginning installation.
- These lighting fixtures must be used with PureEdge Lighting 24 volt Vanishing Point Monopoint system and track systems only.
- This product is dimmable when the system is powered with PureEdge 0-10 volt, ELV and Universal power supplies.

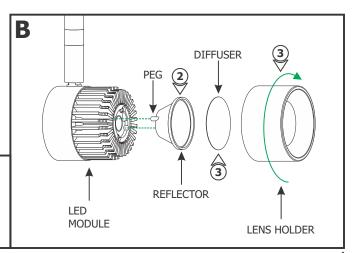

Section One: Replace the Reflector and Diffuser

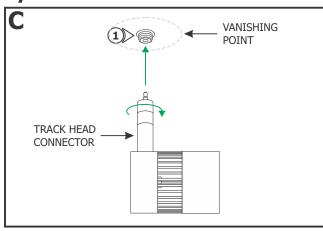

1: Unscrew the lens holder counter-clockwise and remove it from the LED module.

- 2: Remove the diffuser. Remove and replace the reflector by aligning the pegs on the reflector with the LED module holes.
- **3:** Replace the diffuser and screw the lens holder back clockwise to secure in place.

Section Two: Install the Track Head for Vanishing Point Monopoint Systems

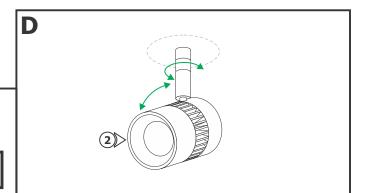

NOTE: Omit this section if installing the track head to Track Systems. Refer to Section Three.

NOTE: Refer to the instructions provided with the Vanishing Point to install the system.

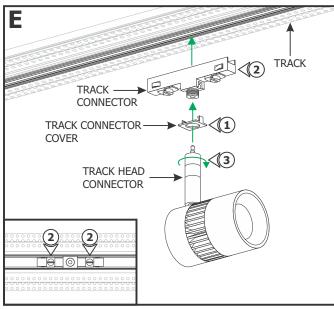

1: Plug the track head connector into the Vanishing Point connector. Use fingers to tighten the connector and secure in place.

- **2:** Adjust the fixture to the desired position by rotating the body vertically or horizontally.
- **3:** Turn the power on.

NOTE: This fixture consumes **10** watts and contains integrated LED lamps which are rated for 50,000 hours.

Section Three: Install the Track Head for Track Systems

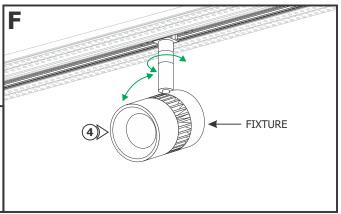

NOTE: Omit this section if installing the track head to Vanishing Point Systems.

NOTE: Refer to the instructions provided with the track to install the system.

- 1: Snap the black or white cover onto the track connector.
- **2:** Insert the track connector into the track. Tighten the slotted screws with a flat head screw driver to secure in place.
- **3:** Plug the track head connector into the track connector. Use fingers to tighten the connector and secure in place.

- **4:** Adjust the fixture to the desired position by rotating the body vertically or horizontally.
- **5:** Turn the power on.

NOTE: This fixture consumes **10** watts and contains integrated LED lamps which are rated for 50,000 hours.

Installation Instructions for **Tubo Large Vanishing Point and Tubo Large Track Head**

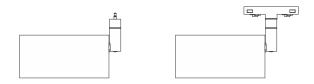

FJ24-TUBL-_

T24-TUBL-_

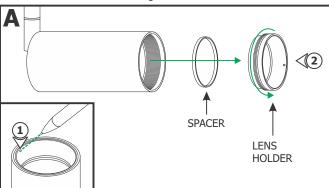

IMPORTANT INFORMATION

- This product is suitable for indoor locations.
- Ensure that power to the electrical box is **OFF** before beginning installation.
- These lighting fixtures must be used with PureEdge Lighting 24 volt Vanishing Point Monopoint system and track systems only.
- This product is dimmable when the system is powered with PureEdge 0-10 volt, ELV and Universal power supplies.

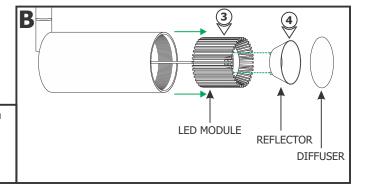

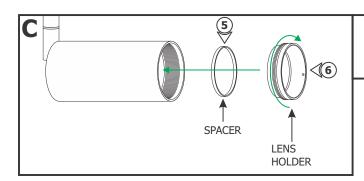

Section One: Replace the Reflector and Diffuser

- 1: Use a pen or small Allen wrench to loosen the lens holder.
- **2:** Unscrew the lens holder counter-clockwise and remove the lens holder and spacer from the fixture.

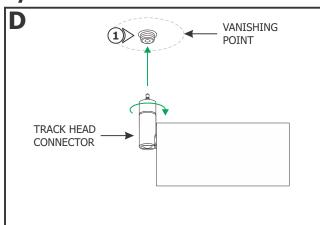

- **3:** Carefully remove the diffuser, reflector and LED module from the fixture.
- **4:** Replace the reflector by aligning the pegs with the LED module holes.

- **5:** Push the LED module, reflector, diffuser and spacer back inside the fixture.
- **6:** Screw the lens holder back clockwise to secure in place.

Section Two: Install the Track Head for Vanishing Point Monopoint Systems

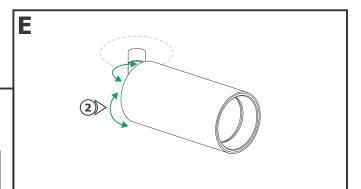

NOTE: Omit this section if installing the track head to Track Systems. Refer to Section Three.

NOTE: Refer to the instructions provided with the Vanishing Point to install the system.

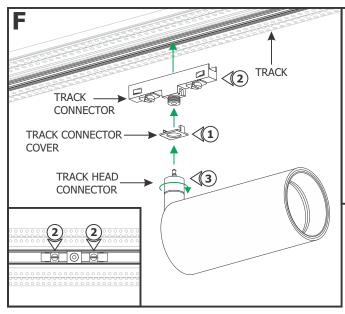

1: Plug the track head connector into the Vanishing Point connector. Use fingers to tighten the connector and secure in place.

- **2:** Adjust the fixture to the desired position by rotating the body vertically or horizontally.
- **3:** Turn the power on.

NOTE: This fixture consumes **15** watts and contains integrated LED lamps which are rated for 50,000 hours.

Section Three: Install the Track Head for Track Systems

NOTE: Omit this section if installing the track head to Vanishing Point Systems.

NOTE: Refer to the instructions provided with the track to install the system.

- 1: Snap the black or white cover onto the track connector.
- **2:** Insert the track connector into the track. Tighten the slotted screws with a flat head screw driver to secure in place.
- **3:** Plug the track head connector into the track connector. Use fingers to tighten the connector and secure in place.

- **4:** Adjust the fixture to the desired position by rotating the body vertically or horizontally.
- **5:** Turn the power on.

NOTE: This fixture consumes **15** watts and contains integrated LED lamps which are rated for 50,000 hours.
