Input:	120-277V, 50/60Hz
Installation:	3/0, 4/0 Junction Box
Dimming:	ELV, TRIAC, 0-10V

PREPARATION:

1. Shut off the power at the circuit breaker and remove any existing fixture, including its mounting plate.

2. Carefully unpack the new fixture and lay out all the parts in a clear area.

INSTALLATION:
The fixture is supplied with the mounting plate pre-installed and secured by the mounting screws (B).

1. Loosen the mounting screws (B) to remove the mounting back plate from the fixture.

2. Secure the mounting back plate to the junction box using the appropriate junction box screws (D).

3. Connect fixture wires to the corresponding building wires with the included wire connectors (A) according to the table.

4. Select the desired color temperature using the switch located at the rear of the fixture.

5. Place the fixture over the mounting plate. Secure by tightening both mounting screws (B) with gaskets (C).

6. To prevent moisture from entering the outlet box and causing a short, use clear caulking (i.e. indoor/outdoor silicone sealant) to outline the outside of the fixture back plate where it meets the wall when used outdoors. Leave a space at the bottom to allow moisture to escape.
