Camille Side Table

By Global Views

Description

The Camille Side Table's quiet and refined design is architectural in form and elegant in execution. The ribbed drum is finished in ivory leather using an artisanal French technique called gainage, in which a fabric or, in this case, leather is applied to a hard surface. The metal top features a concentric, etched detail inspired by European watch making; the top and bottom metal elements encapsulate the central columnal form. Available in white bronze and dark bronze finishes.

Shown in white bronze / ivory

Specifications
