Prairie Mirror

By Global Views

Description

The Prairie Mirror has iron filaments that are carefully welded to the mirror's frame so that each piece is perfectly, evenly spaced. Then the frame is shaped into a 3-D waving motion and an outer frame is added to the edges. Brass braising highlights the base of the glass and edges of the mirror. The Prairie Mirror is deceptively large at 46 inch diameter and makes a strong statement wherever it hangs. Beveled glass. Hangs by a 6 inch metal wall cleat that is provided.

Shown in bronze / mirror

Specifications
