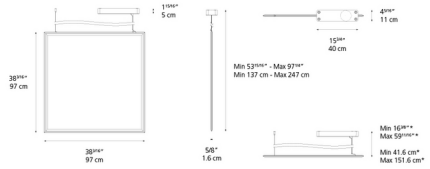
Discovery Space Pendant

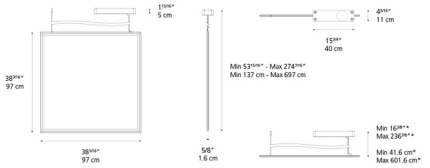
By Artemide

Description

The Discovery Space Pendant by Artemide, a visionary creation from Ernesto Gismondi, redefines the interaction between light and perception. This fixture starts as a seemingly immaterial presence, an utterly absent element that dramatically transforms into a breathtaking source of perfectly diffused light.Its design marvel lies in a very light square rim that subtly conceals an LED strip. This strip channels light into a specially engineered surface, embedded with micro-particles so fine they remain virtually invisible when the light is off. When the fixture is turned on, the transparent interior springs to life, appearing to magically fill with a uniform radiance, turning emptiness into a stunningly emissive surface. This captivating illusion makes the Discovery Space Pendant an unparalleled centerpiece for any Contemporary interior. You can choose from sophisticated Black, Bronze, or Polished Aluminum finishes to perfectly complement your design scheme. May be installed vertically or horizontally.

Shown in polished aluminum / transparent





Specifications

COLOR	Transparent
