Skaal Outdoor Solar Lantern

By Les Jardins Solar Lighting

Description

The Skaal Outdoor Solar Lantern takes its bold, clean form from contemporary Scandinavian design, achieving a simple yet sophisticated aesthetic suitable for landscape settings ranging from organic modern to industrial chic. Line up some Skaal lanterns poolside or cluster them around an outdoor seating area to create a warm ambiance. The Weathered Teak option is made of teakwood, while the Space Grey and Corten feature aluminum construction. The LED module is rechargeable using the solar panel or micro-USB charging port. It has a simple on/off mode and a smart mode that automatically adjusts brightness based on ambient light and power reserves. The 3W 500 lumens option also has a motion sensor and dusk to dawn setting. A push button on the LED module is used to turn the light on or off, set dimming level, turn the motion sensor on or off (if available), and select operation modes. For the 2W 300 lumens option, a solar charge takes 8 hours in optimal conditions, and a fully charged light stays on for 4-150 hours depending on the dimming level used. For the 3W 500 lumens option, a solar charge takes 8 hours, a USB charge takes 7 hours, and a full charge lasts for 5-200 hours.
