## Wireline Pendant By FLOS

### Description

Discover the unique intersection of artistic expression and industrial design with the Flos Wireline Pendant, a fixture where functionality beautifully meets the unexpected. This captivating design features a suspended light source elegantly encased within a transparent glass tube, creating a luminous focal point that is both ethereal and bold. The pendant's striking aesthetic is defined by its robust rubber cables, which not only provide structural support but also allow for highly customizable height adjustments during installation, transforming the fixture's presence within a space. The Wireline Pendant is particularly suited for spaces with high ceilings, where its dramatic length can be fully appreciated. It offers remarkable versatility, capable of being installed as a single, commanding suspended light or grouped in multiples to create larger, more intricate lighting installations. This makes it an ideal choice for grand hotel and office lobbies, expansive home lofts, and other open-plan contemporary spaces that demand a lighting solution that is both visually arresting and functionally brilliant. A dimmer compatibility reference is typically available to ensure optimal performance.

### Specifications
