Atomic Pendant

By Dainolite

Description

There's no denying the beautiful physics of the Atomic LED Pendant from Dainolite. It's the piece you want if you're looking for great visual impact. It appears to defy the laws of gravity as it hangs with an ultra-fine cord. The compact, low-profile canopy makes the piece easy to mount on its own or in series. Creating an intriguing sense of movement, the piece slices in half a bright glass globe. Sleek metal trimmings accentuate the splitting action with modern sophistication. The two white glass domes double up the amount of light. Turn the piece on and receive a radiant upward and downward glow.

Specifications
