DESCRIPTION

Save your body from excess wear and tear by gardening with the assistance of the Adnan Stool. This LED-powered stool is made with polyethylene resin and is made from 100% recyclable materials. Unlike a normal garden stool, this gardening stool shines LED light that helps consistently warm and grow your plants. Shock-resistant and lightweight, it's easy to move depending on the size of your garden. Upgrade your indoor/outdoor planting capabilities with this versatile, LED stool. This is a battery operated unit with internal lighting. Includes charger and remote control for switching colors. Nine programmed RGBW color options with three white LED color temperature options (Warm White 2700K / Natural White 4000K / Cool White 6500K).
