LENS16 2 Inch Lens / Glare Control Accessory By WAC Lighting

Description

The LENS16 2 Inch Lens/Glare Control Accessories are designed for use with WAC Lighting MR16-type track and recessed fixtures. Colored Lens is used to change the color of the light. Clear Lens permits the safe use of lamps without glass. Frost Lens helps to reduce glare. Honeycomb Louver is used to prevent glare. UV Lens protects artwork and fabric from fading. Spread Lens directs the lamp beam to create a diffused light, spreading light in an even pattern. Beam Elongating Lens directs lamp beam to create a horizontal or vertical strip of elongated light. Cross Louver shields lamp and controls light and glare, 45 degree cutoff. Lens Clip accessory snaps over lamp and holds lenses or honeycomb louver firmly in place. Use only with exposed lamp fixtures.

Shown in brushed nickel
