Ball Rod Bracket Wall Light

By Michael Anastassiades

Description

The Ball Rod Bracket Wall Light, designed around the classic incandescent bulb, is an exercise to abstract the bulb into a perfectly spherical ball, celebrating its perfect shape by repeating it in metal. The brass finish is unlacquered and will naturally oxidize and darken over time. Includes a paintable junction box cover which will cover standard 4 inch junction boxes. The j-box cover extends beyond the fixture and will be visible. Upon ordering, please supply required drop length of fixture, measured from the top of the bracket to the bottom of the socket. Available from 8 to 82 inches. Please contact Customer Service to order.
