## Spring Balanced Table Lamp

By Midgard

### Description

The fully adjustable Spring Balanced Table Lamp features a movable arm and swiveling shade for directing light to exactly where it is needed. The jointed arm mechanism is derived from the human arm, and Midgard perfected this parallelogram spring arm design in the 1950s. Traditional manufacturing methods and materials are still used, including spun aluminum for the shade. The shade and steel frame and base are powder-coated in black or white for a durable finish. With its vintage appeal and high-quality design, this piece brings both style and function to offices and other work areas. On/off switch on top of shade.
