**DESCRIPTION**

Based on the articulating lamp design invented by Curt Fischer in the 1920s, the Modular 551 Table Lamp features an adjustable shade and jointed arm, providing illumination that can be directed precisely onto work surfaces or reading areas. Materials and manufacturing processes of a bygone era are honored, with the shade crafted out of spun aluminum and its on/off turn knob made of Bakelite. The steel arm and base, along with the shade, are powder-coated in black or white for a durable finish. All parts are made in Germany and hand-assembled in Hamburg. The Modular is the perfect blend of function and style for your space.
