Keglen Wall Sconce

By Louis Poulsen

Description

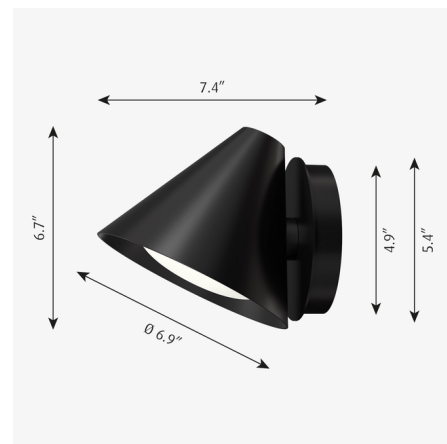

The Keglen Wall Sconce offers a sleek, modern lighting option with a distinctive conical shade and curved polycarbonate diffuser to deliver glare-free, directed light. A small opening in the top of the shade also allows some light to escape in the opposite direction for a touch of ambiance. The fixture may be mounted facing up or down, and the shade rotates 45 degrees in either direction to direct light precisely where it is needed. Electronic LED driver is housed inside canopy. Dimmer control is located on the blackplate. Warm Dim (2700K - 2000K) integrated LED.
