Earth Stool with Backrest

By Mater Design

Description

The Earth Stool with Backrest is the result of a new recycling technique that allows Mater Design to repurpose industrial waste into useful products. Plastic waste is combined with coffee bean shells left over from the roasting process to form the stool's seat and back. The tubular steel frame also consists of 20% upcycled steel. As sustainable as it is stylish, the Earth Stool features a streamlined design perfect for a modern interior.

Shown in gunmetal / light coffee
