Pagoda Outdoor Wall Sconce By Maxim Lighting

Description

The Pagoda Outdoor Wall Sconce is an impactful shrine of light and features a stacked structure with slanted roof lines over an open pavilion free of glass. The LED light source is contained in the lower structure provides ample light downwards in addition to casting light upwards to create a warm glow within the frame. A large, flattened ring perches above the lanterns, which are then supported by hooks on the larger sizes. The fixtures are made more robust by eliminating the use of glass panels entirely.
