WiZ Connected OnCloud Smart Wi-Fi Dimmer - Overstock

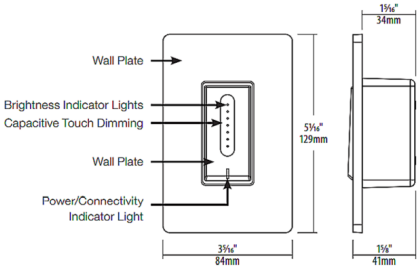

By Liteline

Description

The OnCloud Smart Wi-Fi Dimmer provides a maximum output of 400W for incandescent bulbs and 150W for fluorescent and LED bulbs. Features an on/off button and a 7-level touch slider for dimming functionality. Radio Frequency Installs just like a regular in-wall switch. Includes snap in wall plate. Replaces single pole switches (not compatible in 3-way applications). Neutral wire required. No hub required. The OnCloud dimmer will work in 3-way applications only with a Room Controller. In this case, the smart fixture is the dimmer. The Room Controller is connected and controls the dimmer. The smart Wi-Fi dimmer is can be controlled via the WiZ app (works with iOS and Android) from anywhere. Voice control can also be achieved by integrating the app with most smart speakers. Works with Google Assistant, Siri, Alexa and IFTTT. NOTE: This is a discontinued model and limited to quantity on hand.
